About the MCPPO Program

In 2022, the MCPPO program proudly celebrates 25 years of public procurement education and outreach as part of the Office of the Inspector's mission to prevent fraud, waste and abuse in the use of public funds.

The MCPPO program offers a variety of virtual, in person, and self-paced online classes, and trainings that address many topics besides public procurement. If you are interested in hosting a training in your area or for your jurisdiction, please contact us.

To commemorate our 25th year, the program is offering a series of free trainings. Please visit our [website](#) for more information. Thank you for your support!
